Subject: Updated Disposal

Sorry Frank. Can you update this statement so I can send out? When did we finish the Office area boxes? Wed?

As of today, material shipped from Niagara Falls Blvd Site is 82 trucks for an estimated 1,824.5 tons.

From this number, 33 tons were shipped in 2016. This material was from the GNBC Office Area and the Area 5 Medium Concentration pile. There are an estimated 4 truckloads left of the Medium Concentration.

The high and low level concentration blend is estimated at 1,977 tons, 85 truckloads. This will complete the disposal of all the material we currently have excavated. At the rate of 10 trucks per day, weather permitting and volume accuracy we should be done with T&D around January 27, 2017.
